

Cover Letter

Dear Hiring Manager,

I am excited to apply for Clinical Development and Clinical Operations opportunities where I can connect scientific trial design with real-world patient-care execution. My MS in Pharmaceutical Sciences provides a strong foundation in drug development, translational research, and clinical trial design, while my PharmD and 15+ years of pharmacy practice give me practical insight into patient adherence, medication safety, documentation quality, and hospital trial logistics.

I would be excited to contribute to clinical trials that are not only scientifically sound, but also operationally practical for sites, providers, and patients. My background positions help me to bridge trial design with real-world execution.

Sincerely, Harmanjit Kaur
